About me

Dynamic Angular developer with over two years of experience in corporate environments, specializing in microfrontend architectures. Proven ability to contribute to the development of cloud platforms through innovative solutions aimed at optimizing performance and code maintainability. The effective integration of Angular, TypeScript, and REST APIs reflects a strong commitment to collaboration and continuous improvement. Passionate about tackling challenges that foster personal growth and drive meaningful digital transformation. Motivated to leverage technical expertise and a collaborative mindset to create user-centric solutions within forward-thinking teams.

Skills & Soft Skills

Italian - English

Work experiences

Angular Developer   07/2023 - Present

ALTEN ITALIA | Remote

I am currently working as an Angular Developer at ALTEN ITALIA, assigned to the client Aruba. After spending a year and a half in the CMP2 team, I am now part of the CMP1 team, where I contribute to the development and evolution of the new CMP (Cloud Management Platform) for managing cloud services.
The environment is highly collaborative and innovation-driven, with a strong focus on performance, scalability, and user experience. We tackle exciting technical challenges daily, working in close synergy with other development teams. Technologies used: Angular > 15 (with microfrontend architecture), NX, TypeScript, SCSS, HTML5, REST API, GitLab, JSON.

Stage – Front-End Developer   01/2023 - 06/2023

ALTEN ITALIA | Milano

During my internship at ALTEN Italia, I was involved in front-end development projects within an enterprise environment, using the Angular framework and related libraries such as NgRx and RxJS. I had the opportunity to apply DevOps methodologies and work with tools like Node.js, JSON-server, Swagger, and Postman. This experience allowed me to strengthen my technical skills in TypeScript, HTML5, CSS, JavaScript, and Bootstrap, as well as improve my soft skills and English communication. I also contributed to the creation of graphic content using Canva.

Curricular Internship – Junior Developer   05/2022 - 10/2022

NIGITHOR | Catania

During my curricular internship at NIGITHOR, I deepened my technical skills in full-stack development. I worked with technologies and tools such as HTML, Postman, Angular, Ionic Framework, Java (OOP), Spring Framework, JDBC, and Oracle databases (SQL). I also used Swagger for API documentation and improved my English proficiency in a professional context.

Design Thinking - Mockup Developer   09/2021 - 12/2021

Project Upskill 4.0 - Steve Jobs Academy – H-FARM | Caltagirone

I took part in a training project within the Upskill 4.0 program by Ca' Foscari University of Venice, hosted at the Steve Jobs Academy, in collaboration with the company H-FARM for the Maize.plus platform. Working in a team and following the Design Thinking methodology, we developed a mockup aimed at identifying and representing areas for improvement within the company. We went through all five phases of the process: Empathize, Define, Ideate, Prototype, and Test.

Education and training

Diploma di Tecnico Superiore per le Tecnologie Informatiche   10/2020 - 11/2022

Steve Jobs Academy | Caltagirone

Two-year post-diploma program focused on web development and game development. The course included 1,080 hours of classroom training and 720 hours of internship, with a strongly hands-on approach and a focus on teamwork. I gained cross-functional skills in programming, digital interface design, and software development methodologies. Final grade: 81/100.

Diploma di istruzione secondaria superiore   2019

Liceo "G. Gentile" – Scienze Umane | Caltagirone
High school program focused on human sciences, with an emphasis on psychology, pedagogy, and sociology. The curriculum developed analytical, communication, and interpersonal skills, valuable in both academic and professional settings. Final grade: 90/100.
